

SIVANNARAYANA ORIGANTI

AWS Cloud & DevOps Engineer

origantisivannarayana@gmail.com | +91 8096497276 | Bengaluru, India | linkedin.com/in/sivannarayana-origanti
| 4.4 Years Experience

PROFILE SUMMARY

AWS Cloud & DevOps Engineer with 4.4 years of experience architecting, automating, securing, and operating highly available production cloud environments across AWS, GCP, and Azure. Hands-on across Infrastructure as Code (Terraform), CI/CD (Jenkins, GitHub/Bitbucket), container platforms (EKS, ECS, GKE), DevSecOps (SonarQube, Trivy, Snyk), cloud security (GuardDuty, Security Hub, WAF), and Linux administration. Delivered a 25% reduction in monthly AWS spend through Reserved Instance planning, rightsizing, and storage optimization. Experienced in managing production support, incident response, RCA reporting, and cross-functional delivery for enterprise clients across Singapore, US, and India.

KEY SKILLS

AWS (EC2, VPC, RDS, S3, IAM)	Route 53	Amazon EKS / ECS	Terraform
Jenkins CI/CD	Docker / Kubernetes	GCP (GKE, Cloud SQL)	Microsoft Azure (VMs)
Cloudflare (DNS/WAF/SSL)	AWS Security Hub / GuardDuty	SonarQube / Trivy / Snyk	Shell / Groovy Scripting
Prometheus / Grafana	CloudWatch / Nagios / Site24x7	DigiCert / ACM / Certbot	Linux Administration (RHEL/CentOS/Ubuntu)
WAF Rate Limiting & Origin Protection	Incident Response		

TECHNICAL SKILLS

Cloud Platforms	AWS (EC2, VPC, RDS, S3, IAM, ALB, Route 53, Auto Scaling, CloudWatch), GCP (Compute Engine, GKE, Cloud SQL), Microsoft Azure (Virtual Machines)
CI/CD & Source Control	Jenkins, AWS CodePipeline, GitHub, Bitbucket
Infrastructure as Code	Terraform
Containers & Orchestration	Docker, Kubernetes, Amazon EKS, Amazon ECS, Amazon ECR
DevSecOps	SonarQube, Trivy, Snyk
Security Tools	AWS Security Hub (CSPM), Amazon GuardDuty, AWS WAF, Cloudflare WAF, IAM, CloudTrail, DigiCert, ACM, Certbot
Monitoring & Observability	Amazon CloudWatch, Prometheus, Grafana, Nagios, Site24x7
Operating Systems	Linux (Red Hat, CentOS, Ubuntu)
Web Servers	Apache, Nginx, Tomcat
Scripting	Shell Scripting, Groovy Scripting
DNS Management	AWS Route 53, Cloudflare

CERTIFICATIONS

AWS Certified Solutions Architect – Associate 2025

WORK EXPERIENCE

Cloud Infrastructure & DevOps Engineer – Logusims Technology Pvt. Ltd.

Bengaluru, India | April 2022 – Present

- Detected and mitigated an active attack attempt against a production application: deployed Cloudflare WAF custom rules and rate limiting, restricted ALB access to Cloudflare-only IP ranges to eliminate origin bypass, and performed server OS upgrades and application security hardening in response.
- Owned AWS, GCP, and Azure infrastructure across multiple production environments, spanning networking, compute, storage, database, and container platforms for enterprise clients.
- Led cloud and DevOps delivery for 4+ client engagements end-to-end, from provisioning through production support, coordinating a team of 3–5 engineers.
- Achieved a 25% reduction in monthly AWS spend via Savings Plans, Reserved Instances, rightsizing, and storage lifecycle optimization.
- Built and maintained Jenkins CI/CD pipelines integrated with SonarQube, Trivy, and Snyk for automated build, deployment, rollback, and security scanning.
- Configured and monitored AWS GuardDuty and Security Hub, driving remediation of CSPM findings to strengthen cloud security posture.
- Managed Cloudflare DNS, WAF, SSL/TLS, and custom firewall rules; administered certificate lifecycle via DigiCert, ACM, and Certbot.
- Directed incident management and production troubleshooting across infrastructure, database, DNS, and application layers; authored RCA and audit reports for client stakeholders.

CLIENT PROJECTS

SGEBIZ – Singapore E-Business Pte. Ltd.

AWS Cloud & DevOps Engineer

Environment: AWS (EC2, RDS, S3, IAM, ALB, Route 53, Auto Scaling, CloudWatch), Terraform, Jenkins, SonarQube, Trivy, GuardDuty, Security Hub, DigiCert, ACM, Cloudflare (WAF/DNS/SSL), Apache Tomcat, Prometheus, Grafana, Nagios

- Achieved a 25% reduction in monthly AWS spend through Reserved Instance planning, rightsizing, and storage lifecycle optimization.
- Managed AWS infrastructure (EC2, RDS, S3, IAM, ALB, Route 53, Auto Scaling, CloudWatch) supporting high-availability production workloads.
- Automated infrastructure provisioning and application deployments using Terraform and Jenkins CI/CD pipelines.
- Integrated SonarQube and Trivy into CI/CD workflows for code quality and container security compliance.
- Configured AWS GuardDuty and Security Hub, and managed SSL/TLS certificate lifecycle via DigiCert and ACM.
- Deployed and maintained Java applications on Apache Tomcat; managed S3 lifecycle policies and CloudFront distribution.
- Implemented monitoring and alerting using Prometheus, Grafana, Nagios, and CloudWatch for proactive issue detection.
- Managed Cloudflare WAF, SSL/TLS, and DNS records; implemented Peppol, OCR, and Oxalis integrations while maintaining platform security and availability.
- Performed Linux administration, OS patching, security hardening, and performance optimization; prepared RCA and periodic health reports for client stakeholders.

Vserv / AudiencePro

AWS Cloud & DevOps Engineer

Environment: AWS, Terraform, Jenkins, Git, Docker, Kubernetes (EKS/ECS), Kafka, Prometheus, Grafana, CloudWatch

- Designed and managed AWS infrastructure supporting large-scale advertising and data processing workloads.
- Provisioned and maintained cloud resources using Terraform for consistent, scalable infrastructure deployments.
- Built and managed CI/CD pipelines using Jenkins, Git, Docker, and Kubernetes to automate application delivery.
- Managed containerized applications on Amazon EKS and ECS, improving scalability and operational efficiency.
- Ran Kafka-based event streaming platforms for real-time data ingestion and processing.
- Implemented monitoring and alerting using Prometheus, Grafana, and CloudWatch to ensure platform reliability.

QueueBuster

Cloud & DevOps Engineer

Environment: AWS (EC2, RDS), GCP (GKE, Cloud SQL), Azure VMs, Jenkins, AWS CodePipeline, Apache, Nginx, MySQL

- Managed cloud infrastructure across AWS, GCP, and Azure for retail and POS applications serving multiple customers.
- Managed Google Compute Engine, GKE workloads, and Cloud SQL provisioning, monitoring, and backup verification.
- Provisioned Azure Virtual Machines and performed backup verification, storage management, and network connectivity troubleshooting.
- Automated application deployments and release processes using Jenkins and AWS CodePipeline.
- Administered Linux servers, Apache, Nginx, MySQL, EC2, and RDS environments supporting production workloads.
- Managed DNS configuration, SSL/TLS certificates, and performed server patching and security hardening.

STOXX Ltd

Production Support Engineer

Environment: Site24x7, SLA Monitoring, Incident Management

- Monitored infrastructure, applications, and delivery pipelines using Site24x7, tracking STOXX and DAX delivery processes.
- Investigated non-delivery, complaint, and bounce notifications; coordinated with support teams on issue resolution.
- Performed daily health checks and system availability monitoring, maintaining SLA compliance through proactive incident management.
- Generated monitoring and audit reports to support business operations and stakeholder reporting.

KEY ACHIEVEMENTS

- Defended a production application against an active attack attempt by implementing Cloudflare WAF custom rules, rate limiting, and ALB-level IP restriction to Cloudflare's network only.
- Reduced monthly AWS cloud spend by ~25% through Reserved Instance planning, rightsizing, and storage optimization.
- Led 4+ client projects end-to-end from implementation through production support.
- Led a team of 3–5 engineers across concurrent client engagements.
- Maintained high availability and operational stability across production environments for enterprise clients in Singapore, US, and India.
